

# GOODBYE CORGI GAS REGISTER

## WHAT IS GAS SAFETY REGISTER?

Gas Safe Register™ is the new hallmark for gas safety in Great Britain. From April 1st 2009, Gas Safe Register replaces the CORGI gas registration scheme as the official gas safety body. So, from 1st April, by law, only Gas Safety registered engineers should carry out work on gas appliances or installations in your home.

## WHY DO I NEED TO USE A GAS SAFETY REGISTERED ENGINEER?

It's all about safety. To make sure that gas appliances such as boilers, fires, ovens and hobs are installed, maintained and serviced safely, you should employ a Gas Safe registered engineer to carry out the work.

If someone other than a Gas Safe registered engineer does the gas work in your home, you could be risking the safety of your family and your property.

## HOW DO I FIND A GAS SAFE REGISTERED ENGINEER?

Finding a Gas Safe registered engineer is easy. All registered engineers are listed on our website. Visit [www.GasSafeRegister.co.uk](http://www.GasSafeRegister.co.uk) or call **0800 408 5500** and our advisers will be pleased to help you find a local engineer who is on the Gas Safe Register.

**If you smell gas** or think there might be a gas leak: turn off the gas at the meter, extinguish naked flames, open windows and leave the area. Seek medical advice if you feel unwell. Call the Gas Emergency Freephone Number 0800 111 999 for further advice.

# BE SAFE, USE A GAS SAFE REGISTERED ENGINEER FOR GAS WORK IN YOUR HOME.

How do I check my engineer is on the Gas Safe Register?

**ALWAYS ASK FOR HIS CARD**

All Gas Safe registered engineers have an ID card with their licence number and a photograph. The licence number is easily verified on the website or by phone and we will get back to you with confirmation of the engineer's name.

If you think your engineer is not registered, just call 0800 408 5500 Or let us know via our website.

### FRONT

Remember to check:

- The licence number
- The start date
- The expiry date
- The security hologram

### BACK

Remember to check:

- Your engineer is qualified for the work in hand
- Their qualifications are up to date.

FROM

**APRIL 1ST 2009**, BE SAFE, USE A GAS SAFE REGISTERED ENGINEER AND ALWAYS CHECK THE CARD.
